Program Assessment Report (2017)

This program assessment report summarizes data collected and analyzed for the purposes of informing program effectiveness and program improvements. Data in the report is based on the 2016 CACREP standards. The sets of data in the annual program assessment include:

- Admissions, Demographics, and Graduation Data
- Program Survey Data
- Core Counseling Student Learning Outcomes for Program Objectives
- CPCE and NCE Scores
- Clinical Evaluation Data
- Student Learning Objectives for Key Performance Indicators

I.   Admissions, Demographics, and Graduation Data

A.   *Admissions (Spring 2017)*

The counselor education program holds admissions once a year for both masters and doctoral programs. For the master's program areas, 69 applicant admissions were reviewed in and/or interviewed in Spring 2017 for fall or summer start dates, 62 admitted, and 29 individuals are attending. Of the 29 attending, the following data were obtained:

Table 1. Summary of Demographics of Students Admitted and Attending Masters Program (2017)

Ethnicity	GRE	MAT	Gender	Age
White=77%	Verbal Mean=151		Female=92%	
	Quantitative Mean=141	MAT Mean=414		Mean=23.5
AA/Black=23%			Male=8%	
	Total Mean=284			

For the Ph.D. in Education, Counselor Education and Supervision concentration, 14 applicant admissions were reviewed and/or interviewed in Spring 2017 for fall 2017 start date, 10 were admitted, and seven individuals are attending. Of the seven attending, the following data were obtained:

II.   Program Survey Data

The School of Education Office of Assessment administers program evaluation surveys on a regular basis. These surveys assess areas of strengths and weaknesses, thus informing program faculty members of areas in need of improvement. Doctoral student alumni and graduation exit survey data are not available due to only recent graduates of the program. Below, the results of these surveys represent:

- Supervisor evaluation of supervisees (master and doctoral)
- Student evaluation of site supervisors (master)
- Alumni Surveys
- Graduation Exit Surveys

Employer data is collected every three years, so this data is not available for 2017 since it was an off-cycle year. In addition, alumni and graduation data was collected for the Ph.D. in Education with no specification to the Counselor Education and Supervision concentration, so data cannot be reported specific to our graduates at this time.

RECOMMENDATIONS

I.   Admissions, Demographics, and Graduation Data

Overall, admissions for both the masters and doctoral programs increased when compared to 2016. There were more concentrated efforts to recruit and modify admission deadlines to increase the number of applications. In addition, more graduate assistantship funding was dedicated to the doctoral program that resulted in an increase of acceptances from admission

For those attending the program, less than half of those admitted and attending in the masters program identified as White. However, more diversity in ethnicity was observed for doctoral admissions. Overall, the need to increase recruitment efforts for a more diverse applicant pool is needed. The following steps were taken by the counselor education program faculty in this effort:

In regards to the graduation data, the majority of our masters students are completing the program within two years. Our part-time doctoral students appear to be completing the program within 4-5 years and full-time, non-funded doctoral students are completing it in four years.

II.   Program Survey Data (Masters)

Overall, the majority of the students rated preparation received in the counselor education program as good to excellent. The ratings leaned more to excellent for graduation data when compared to the alumni data and may indicate that some of the suggestions made in past graduation survey were implemented. In addition, the surveys highlight a continuing need to help prepare students who will be working with different forms of technology, specifically in the school counseling area. Areas that need continuing attention is supporting the CCSA program, networking opportunities prior to graduation, and attending to licensure preparation for those who want to pursue an LPC.

We added a new faculty member in Fall 2017 to address some of the needs of the CCSA program. In addition, we are continuing to advertise and support opportunities for the CCSA students. We offered three different elective courses required for LPC in Summer 2017. Finally, are working with our clinical site supervisors to help expose students to different forms of technology that will be part of their work in counseling positions.

III.   Program Objectives

The program objectives chart for both the masters and doctoral program areas represent how current student learning outcomes as measured by key performance indicators are performing. Based on the data collected, it appears that the majority of students are demonstrating how they are meeting or excelling on these program objectives. This indicates that the program objectives, at this time are appropriate for the program.

Some data was unavailable due to core faculty on research leave in summer and fall 2017. In addition, our colleagues in the research foundations did not complete the SLO data consistently for students enrolled in EDUS 660. We are planning to be more diligent in working with these colleagues to collect

this data this year. Additionally, the doctoral program faculty begin to modify course offerings to be more congruent with the focus of the VCU School of Education. This includes the substitution of an advanced multicultural counseling course for the advanced career counseling course. This should address some of the relative weaknesses in the areas of advocacy, leadership, and social justice.

At this point, the counselor education program will begin the process of refining the objectives.

IV.   NCE/CPCE Pass Rates

Currently, the CPCE is the comprehensive exam for the masters program students. It is typically taken after the completion of the majority of the course work and prior to the last semester of the student's matriculation in the program. This test is also revised once a year with new norm-group data used for that specific revision. It covers the following core counseling areas:

- Human Growth and Development
- Social and Cultural Diversity
- Helping Relationships
- Group Work
- Career Development
- Assessment
- Research and Program Evaluation
- Professional Orientation and Ethical Practice

Our students performed very well on this exam with no consistent patterns of needs identified within the data.

The NCE is an optional test that students can take. It is not required for the LPC in the state of VA but can be required in other states. It includes questions from similar areas as the CPCE. None of the masters or doctoral students took the exam.

In 2017, the Counselor Education faculty decided to phase out the use of the CPCE exam as its comprehensive exam and created one of its own. Students began to take this multiple-choice exam in 2018.

V.   Student Dispositions

Student disposition data is collected at various times during the matriculation of a student throughout the program. It begins during admissions. For the masters students who attend the interview, they are required to participate in an on-site writing exercise where they respond to their choice of the professional standards of behavior (dispositions). These are reviewed by the counselor education faculty as part of the admissions process. In addition, the masters students have instructors/site supervisors/faculty supervisors rate their professional behaviors in CLED 602, 604/608, and 672. These results were in the table earlier in the report. Finally, those professional behaviors are reviewed by the faculty during the annual student review. Based on the data, it appears that the masters students demonstrated progress with their professional behaviors. This is what is expected. Lower ratings (but

still adequate) are reported in CLED 602 and improve to more targeted behaviors in CLED 672 (internship). The counselor education faculty will continue to use these measures and review for the masters students.

For the doctoral program, evaluating professional behaviors begins during the individual admissions interview with the faculty. In addition, the doctoral students have instructors/site supervisors/faculty supervisors rate their professional behaviors in CLED 730 (Advanced Practicum). These results were in the table earlier in the report. Finally, those professional behaviors are reviewed by the faculty during the annual student review. Based on the data, it appears that the doctoral students demonstrated professional behaviors that exceeded expectations. Based on the limited formal data, upon review the counselor education faculty have decided to add an additional rating of professional behaviors to the continuing doctoral status timeframe and to revise the CLED 730 professional behavior questions.

VI.   Clinical Data

Masters Practicum and Internship Students

For the practicum, the counselor education faculty have an expectation that students will receive ratings that are appropriate for a beginning counseling student. This would mean that ratings of Adequate or Very Good may be the most consistent ratings. This was true for the practicum students during 2017. For internship students, we expect to see progress with these ratings to more consistent ratings of Very Good and/or Target. This was true of the internship students during 2017, as well. We monitored ratings of N/A and NR, which may indicate more specific training with site supervisors are needed. In 2016, we had noted there were several N/A and NR ratings provided but less were noted in 2017.

In addition to the supervisors' ratings of the students, we collected data on the students' rating of their site supervisors. For 2017, these were overwhelmingly positive for both practicum and internship students. Site supervisors are encouraged to review Tables 5, 6, 9, & 10 to see any items that may need additional attention. We will continue to work with site supervisors on technology, skills demonstration, and crises plans.

Doctoral Advanced Practicum Students

The advanced practicum is a way for doctoral students to demonstrate seasoned clinical skills and explore new/different theoretical approaches to their clinical work. The ratings indicated that the doctoral students exceeded expectations of their clinical work during 2017.

VII.   Student Learning Outcomes for Key Performance Indicators

Key Performance Indicators (KPIs) are indicators of student learning that occur at multiple points in time during a student's matriculation in the counselor education program. This is useful to keep in mind when reviewing the charts that report data across the year (i.e., Spring, Summer, & Fall). For example, we expect to see some progress over time. The most observable change can be seen for students in practicum in spring and then in internship during the fall semester.

Masters

Overall, the majority of masters students are meeting or exceeding on the KPIs for the core and specialty areas of CCSA and School Counseling. There continues to be some data missing due to inaccurate rubrics or core faculty not teaching, which should be corrected this year.

The Counselor Education program faculty will be modifying some of the KPIs based on the current data and how the data informs the program.

Doctoral

Overall, the doctoral student KPIs indicate that the majority of students demonstrate strong performance. Although performance is adequate in the area of research, this can be an area that needs strengthening.

The Counselor Education program faculty have decided to revise the KPIs in this area to be more specific and accurate to the students' experiences. In addition, there are some changes occurring within the doctoral program curriculum that necessitates these revisions as well.
